

The IADIS International Conference **e-Society 2007** was held in Lisbon, Portugal, **3-6 July, 2007**. This conference was part of the Multi Conference on Computer Science and Information Systems 2007.

The IADIS e-Society 2007 Conference had the goal to address the main issues of concern within the Information Society. This conference covered both the technical as well as the non-technical aspects of the Information Society. The broad areas of interest were eGovernment / eGovernance, eBusiness / eCommerce, eLearning, eHealth, Information Systems, and Information Management.

This conference received 167 submissions from more than 31 countries. Each submission had been blindly reviewed by an average of three independent reviewers, to guarantee that the final result of the accepted papers was of a high standard. As a result only 34 full papers were approved which meant an acceptance rate below 21 %. A few more papers were accepted as short papers, reflection papers and posters.

Besides the presentation of full papers, short papers, reflection papers and posters, the conference also offered two keynote presentations from internationally distinguished researchers Professor Mireia Fernández Ardèvol, Universitat Oberta de Catalunya (UOC), Barcelona, Spain, and Professor António Câmara, YDreams and FCT - New University of Lisbon, Portugal.

The Conference Proceedings were published both in Book (ISBN: 978-972-8924-35-5) and CD-ROM (ISBN: 978-972-8924-41-6).
