The 15th edition of the **International Conference on e-Society** was held in Budapest, Hungary, during 10 – 12 April, 2017.

This conference was organized by the International Association for Development of the Information Society (IADIS).

This event focused on the main areas within Information Society. It covered both the technical as well as the non-technical aspects of the Information Society. The conference broad areas of interest were: e-Society and Digital Divide, e-Business / e-Commerce, eLearning, New Media and e-Society, Digital Services in e-Society, e-Government /e-Governance, e-Health, Information Systems, and Information Management.

The 2017 edition had 139 submissions from more than 31 countries. Each submission was blindly evaluated by an average of 4 independent reviewers, to ensure the final high standard of the accepted submissions. Out of the papers submitted, 23 received blind referee ratings that signified acceptability for publication as full papers (acceptance rate of 17%), while some others were published as short papers and reflection papers.

Extended versions of the best papers were selected to be published in:

- the Interactive Technology and Smart Education (ITSE) journal (ISSN: 1741-5659)

- the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

In addition to the presentation of full, short and reflection papers, the conference also included two keynote presentations given by Professor Dragan Gasevic, Chair in Learning Analytics and Informatics, The University of Edinburgh, Scotland, and Professor Albert Boonstra, Vice Dean of the Faculty of Economics and Business and Professor of Information Management, University of Groningen, The Netherlands.
